

ANDURIL

Robotic Defense and AI Command Systems

Rainmaker Securities presents Anduril as the October 2026 Raindrop of the Month. Founded in 2017, Anduril has rapidly established itself at the forefront of modern homeland defense. Instead of sending thousands of foot soldiers into enemy territory, Anduril builds battle-ready machines and sensors designed to be controlled from overseas. From AI-piloted vehicles to state-of-the-art devices to Lattice (an AI command system coordinating and directing all the machines at once), Anduril has revolutionized the frontier of defense. Just nine years in, they are one of the most requested names on our desk.

ARMY CONTRACT

10-year ceiling, March 2026

WHAT THEY BUILD

Autonomous aircraft

- **Fury:** AI-piloted jet that flies alongside F-35s as a drone wingman.
- **Ghost:** autonomous reconnaissance drone used by the U.S. Army.
- **Altius:** tube-launched drone for strike and reconnaissance.

Sensors & scanners

- **Sentry towers:** autonomous towers that monitor borders and bases.
- **Wisp:** 360-degree infrared camera that identifies threats automatically.

Underwater vehicles

- **Ghost Shark:** extra-large autonomous submarine for the U.S. and Australian navies.
- **Dive-LD:** long-range autonomous submarine in U.S. Navy service.
- **Surface vessels:** unmanned ships built with HD Hyundai.

Missiles & interceptors

- **Barracuda:** cruise missile designed for mass production.
- **Roadrunner:** jet-powered interceptor that flies home if it is not used.

Air defense & tracking

- **Anvil:** interceptor drone that knocks hostile drones out of the sky.
- **Pulsar:** electronic warfare system that jams them. Both are in service with U.S. forces.

Soldier systems

- **EagleEye:** the mixed-reality helmet program Anduril took over from Microsoft.

ALSO IN THE LINEUP

- **Bolt-M:** backpack strike drone, 600+ bought by the Marines.
- **Omen:** long-range VTOL drone, 50 ordered by the UAE.
- **Copperhead:** torpedo drone fired from autonomous subs.
- **Seabed Sentry:** sensor nodes that live on the ocean floor.
- **Menace:** command center that ships in a container.
- **Rocket motors:** 6,000 a year from its Mississippi plant.
- **Anduril-26:** its first satellite, launched July 2026.
- **Golden Dome:** space-based interceptor prototypes.

Lattice: AI central command

Every Anduril system reports into Lattice: a singular AI command and control platform (the AI general of the army). Lattice processes all these feeds at once, calculates, and directs thousands of machines simultaneously to do its bidding in real time.

2026 SO FAR

MARCH

Army signs a ten-year enterprise contract with a \$20B ceiling, replacing more than 120 separate procurements. Fury production begins at Arsenal-1 in Ohio.

MAY

\$5B Series H closes at a \$61B valuation, led by Thrive Capital and Andreessen Horowitz. Roughly double the June 2025 round.

JULY

Fury fires a live AIM-120 AMRAAM. First Ohio-built aircraft rolls out three months early. Reuters reports talks for a round near \$100B, unconfirmed.

SEPTEMBER

Fury flies in formation with F-35s, and the Air Force now flies one daily from Creech. Roadrunner and Barracuda join the Ohio line by year end.
