The private market has split into two distinct tiers! At the top, the hottest tech companies command the strongest demand. Anthropic's employees declined to sell shares at the $350B tender price in April, and within weeks, secondary desks were pricing the company north of $1 trillion. Now, with the IPO in focus, price talk is in the $1.3T+ range. OpenAI's $7B August tender cleared flat at $852B, while its rival now trades above it on the secondary tape. Databricks is changing hands at or above its $190B round while its IPO drifts to 2027. Beyond these headliners, the picture looks markedly different. Trading volume on Rainmaker jumped 57% quarter over quarter in Q3, yet roughly 84% of trades cleared below the last primary valuation. Liquidity is abundant, but it's only flowing into a handful of names, and sellers elsewhere are accepting discounts to complete trades. With the IPO window stuck half-open, secondaries aren't the side door anymore. They have become the main route to liquidity, and buyer access is limited.

Against this backdrop, Rainmaker Securities presents Anduril as the November 2026 Raindrop of the Month! Founded in 2017, Anduril has rapidly established itself at the forefront of modern homeland defense. Rather than sending thousands of foot soldiers into enemy territory, Anduril builds battle-ready machines and sensors designed to be controlled from overseas. From AI-piloted vehicles to its state-of-the-art device Lattice, an AI command system coordinating and directing machines simultaneously, Anduril has revolutionized the frontier of warfare. In less than a decade, it has cemented itself among the most closely watched private companies and one of the most requested names on our desk.

Lattice: AI central command

Every Anduril system reports into Lattice: a singular AI command and control platform (the AI general of the army). Lattice processes all these feeds at once, calculates, and directs thousands of machines simultaneously to do its bidding in real time.

2026 SO FAR

MARCH
Army signs a ten-year enterprise contract with a $20B ceiling, replacing more than 120 separate procurements. Fury production begins at Arsenal-1 in Ohio.

MAY
$5B Series H closes at a $61B valuation, led by Thrive Capital and Andreessen Horowitz. Roughly double the June 2025 round.

JULY TO SEPTEMBER
Fury fires a live AIM-120 AMRAAM, then flies in formation with F-35s. Reuters reports talks for a round near $100B, with a second stage near $110B within a year. Not confirmed by the company.

OCTOBER
Navy awards up to $2.9B for Virginia-class submarine components, and Anduril commits $3.7B to a new Maryland shipyard. Army adds up to $1.8B to field NGC2 with I Corps.
